EDUCATION

Princeton University, Princeton, NJ

Expected May 2029

B.S.E. in Electrical & Computer Engineering | Cumulative GPA: 3.82

Relevant Coursework: Contemporary Logic Design (Verilog); Introduction to Programming Systems (C) - Fall 2026

City Colleges of Chicago, Chicago, IL

Jun 2024 - Jul 2025

Associate's Degree in General Studies, Early College Program

PROJECTS

EchoAssist, *Swift, SwiftUI, CoreML, Apple Intelligence Foundation Models*

- Live speaker-labeled captions generated fully on-device by two streaming CoreML models (Parakeet ASR, Sortformer diarization) synced on a shared audio clock, running ~0.6s behind real time.
- On-device transcript summarization via Apple Intelligence Foundation Models and translation into six languages through Apple's Translation framework.

EXPERIENCE

iOS App Dev & Machine Learning Program, **Everyone Can Code Chicago**, Chicago, IL

Jun 2026 - Jul 2026

- Built EchoAssist over a six-week paid cohort program run in partnership between Apple and the City of Chicago.
- Advanced to the second round of the program showcase competition, top 12 of 56 teams, judged by Apple engineers.

Software Engineer, **Relay**

Jun 2026 - Present

- Shipped the friendship, concerts, and messaging systems for a five-person cross-platform Flutter music-sharing app.
- Authored engineering design documents covering Firestore data modeling, transaction safety, security rules, and abuse and scale analysis.

HoagieHelp Developer, **Hoagie Club**

Feb 2026 - Present

- Building frontend components in Next.js, React, TypeScript, and Tailwind for a student academic support platform, with contributions to Python backend services.

Digital Creators Intern (Spatial Computing), **Project:VISION, Inc.**, Chicago, IL

Jun 2025 - Jul 2025

- Built AR prototypes in Spline and Reality Composer for Apple Vision Pro; selected to present at Apple's Everyone Can Code Showcase.

Microelectronics Program Participant, **MIT Beaver Works Summer Institute**

Jul 2024 - Aug 2024

- Built an AI-powered home security system with a four-person team: 180° pan/tilt, face and fingerprint identification, and automated threat-level notifications; presented to a 50-student national cohort.

ACTIVITIES

Tinker Member, **Princeton University Robotics Club**, Princeton, NJ

Sept 2025 - Present

- Hands-on firmware, hardware bring-up, and debugging projects, including vintage iPod refurbishment.

HONORS

Engineering Futures Award, **Chicago Engineers' Foundation**

\$5,000 merit award, 2026

2nd Place, **IEEE SSCS Arduino Contest**

2024

SKILLS

Hardware & Digital Design: Verilog; digital logic design; Arduino / ESP32; circuit fundamentals

Programming: C++; Python; Swift; Dart; TypeScript / JavaScript

Frameworks & Tools: SwiftUI; CoreML; Flutter; Firebase / Firestore; Next.js / React; Git; Xcode; LaTeX

Spoken: English (native); Cantonese (native); Mandarin (professional proficiency)
